NOVA[®]

The Sasko family started in Donora, Pennsylvania, approximately 30 minutes southeast of Pittsburgh, Pennsylvania.

Since the business began in 1974, Regal Industrial has expanded to service the Northeast, Great Lakes, and Midwest regions.

Case Study: Nova 3®

Regal Industrial - Donora, Pennsylvania

We have developed teamwork, training and efficient project applications to meet and exceed customer's expectations.

This commitment and the engineered approach has greatly assisted our organization to assure and consistently provide expert workmanship and provide quality, completed projects before the client's deadline.

Before I used the Nova 3 I used a Bullard hood for blasting. The Bullard hood was very uncomfortable, and if you had to lay down it would almost fall off of your head, it was always moving around. The Nova 3 stays in place the entire time no matter what I do.

The company bought a Nova 3, and I tried it out and I loved it!

My job, sandblasting and metalizing, has been better because of the comfortable fit of the Nova. I wear the hood for 8 hours a day and being comfortable is very important.

I can't put numbers on it, but I know being comfortable while working increases productivity.

Making the job easier by using top of the line equipment makes a world of difference, and Nova hoods, compared to any other hoods are the ones that do that for you.

Nova3® Blast Respirator
with Flow Control Valve

"I wear the hood for 8 hours a day and being comfortable is very important!"

- Jason Morrison
