

Protecting you for life's *best* moments.®

Case Study:  
**Nova 3<sup>®</sup>**

---

Travis Turner Companies - Montrose, Pennsylvania

**Before having the Nova 3 some of the previous challenges faced included poor field of vision, poor air quality, and user discomfort.**

The decision to get the Nova 3 was due to an increase in business. We went from using beat-up old rental equipment to new RPB equipment. Our equipment came from Norton sandblasting.

## Case Study: Nova 3®

Travis Turner Companies - Montrose, Pennsylvania

**The main thing that changed was an increase in productivity. When the user is more comfortable and has a better view of what is being blasted you simply get more done, thus driving up profits.**

All of the above, costs have been lowered which leads to higher profitability and the ability to remain very competitive. Employees love the comfort. No one likes to be in a sandblast hood all day, so one that's more comfortable is a no brainer.

Spend the money on a good quality product. You will see the return on the investment in no time. Plus you're more apt to keep employees around and happy.
